## **PURPOSE**

Aspiring Software Engineer with hands-on experience in Python, JavaScript, and full-stack development. Passionate about building Al-powered applications and crafting responsive, user-centric web experiences. Seeking mentorship opportunities in web development while eager to contribute strong technical skills to solve real-world software challenges.

## **EDUCATION**

# **University of Oregon**

Bachelor of Science in Computer Science (Expected June 2028) Relevant Coursework: MATH 251, CS 110, CS 122, CS 210

**California State University: Sacramento** 

Attended Aug 2022 - May 2023 Relevant Coursework: CSC 10, CSC 15

## **PROJECTS**

Trebbbble | HTML, CSS, Javascript, Python

- Developed a full-stack web website using Flask and ACRCloud's API to identify music from short-form content.
- Designed a clean, minimalistic frontend for an intuitive user experience, optimizing performance and responsiveness.

## Byte 'n Bite | Python, OpenAl API

- Designed and built Al-powered recipe generator using OpenAl's API, improving user engagement by 35%.
- Collaborated with a team of 6 developers to integrate frontend and backend functionalities.

#### **EXPERIENCE**

#### Lead Designer | QuackHacks 2025

- Created a cohesive brand with a memorable logo, engaging color palette, and themed visuals to enhance brand recognition and align with the hackathon's tech-driven focus.
- Produced promotional graphics and signage to reinforce brand consistency across digital platforms, social media, and physical event materials.

#### **TECHNICAL SKILLS**

- Programming Languages: Python, Java, HTML, CSS, JavaScript
- Software & Tools: Git, VS Code, Figma, Microsoft Office, Adobe Suite
